General StyleVars

StyleVar	What it Does
ad_margin	Changes the display height of user avatars throughout the vBulletin suite
ad_padding	

StyleVar	What it Does
announcement_background	Changes the display height of user avatars throughout the vBulletin suite

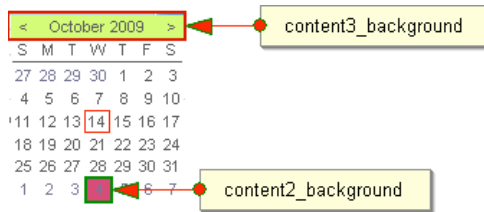

StyleVar	What it Does
avatar_height	Changes the display height of user avatars throughout the vBulletin suite

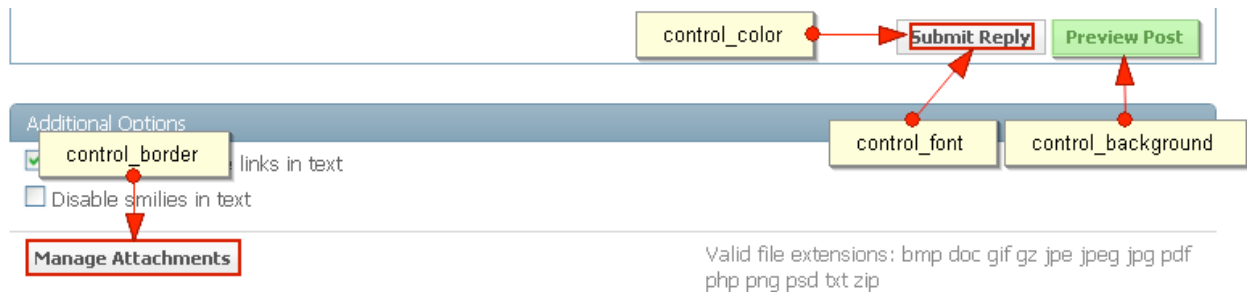

StyleVar	What it Does
----------	--------------

body_background	Changes the color of the content frame's background
body_color	Changes the color of the non-specified text in the background

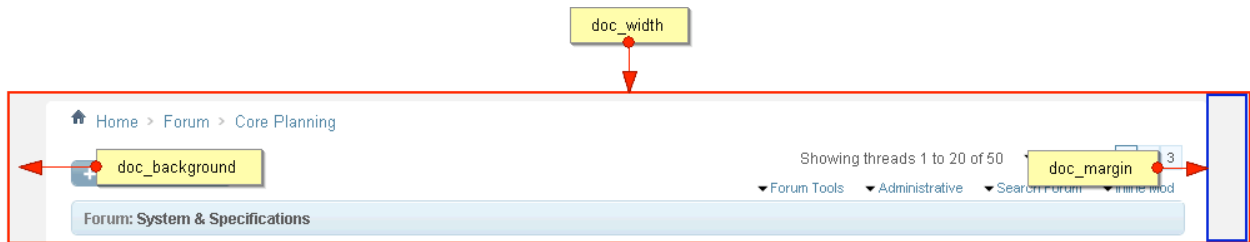

StyleVar	What it Does
content2_background	Changes the highlight color for the day in the date selectors
content3_background	Changes the background color of the month bar for the date selectors

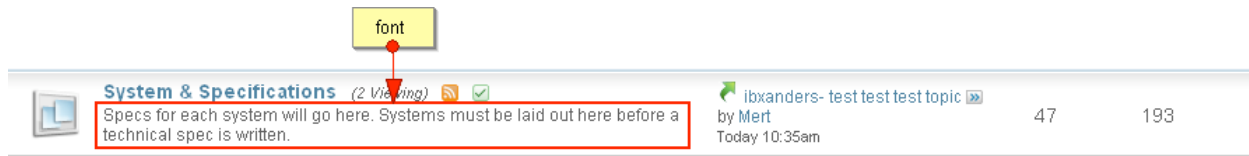

StyleVar	What it Does
control_background	Changes the color or pattern of the button background.
control_border	Changes the color and width of the button border.
control_color	Changes the color of the button font.
control_font	Changes the size and style of the button font.
control_hover_background	Changes the color of the back

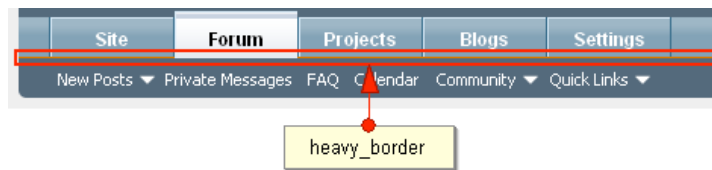

StyleVar	What it Does
control_content_background	Changes the background color or image for all post and reply buttons.
control_content_border	Changes the border width and color for all post and reply buttons.
control_content_color	Changes the font color for all post and reply buttons.
control_content_font	Changes the font size and style for all post and reply buttons.
control_content_hover_background	Changes the color of the background when a button is hovered over.
control_content_padding	Changes the amount of padding around the button.
control_content_radius	Changes whether or not the corners of the buttons are rounded.
control_content_shadow_color	Changes the color of the buttons drop shadow.

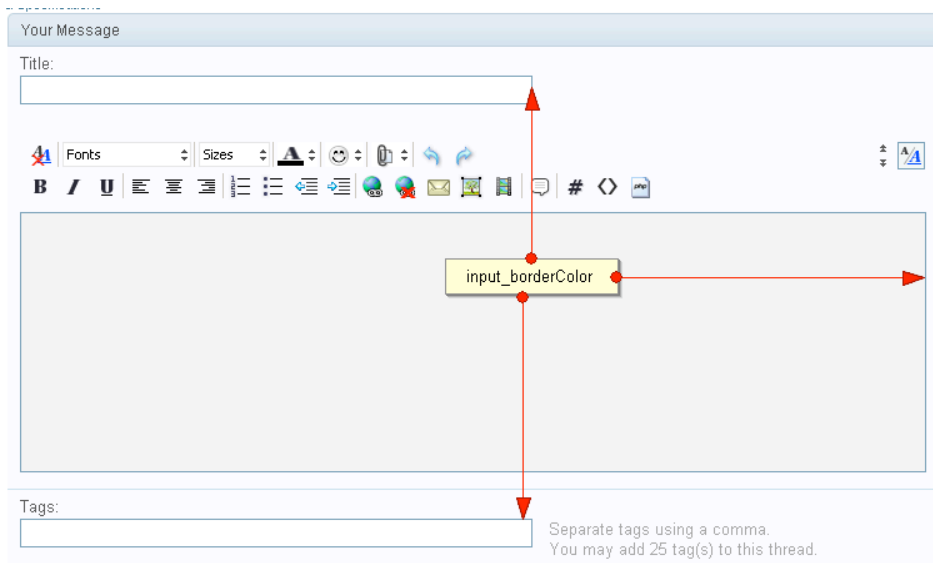

StyleVar	What it Does
doc_backgroundColor	Changes the color of page background
doc_margin	Changes the amount of space between the browser window and the main content window
doc_maxWidth	Changes the maximum pixel width of the vBulletin suite. This is automatically set if you enter a doc_width.
doc_minWidth	Changes the minimum pixel width of the vBulletin suite
doc_width	Changes the fixed pixel width of the vBulletin suite. This is useful to set if the vBulletin suite is embedded or nested in a larger webpage

StyleVar	What it Does
font	Changes the font style for the general text of the vBulletin suite

StyleVar	What it Does
heavy_border	Changes the width and color of the space between the tab bar and the navigation bar

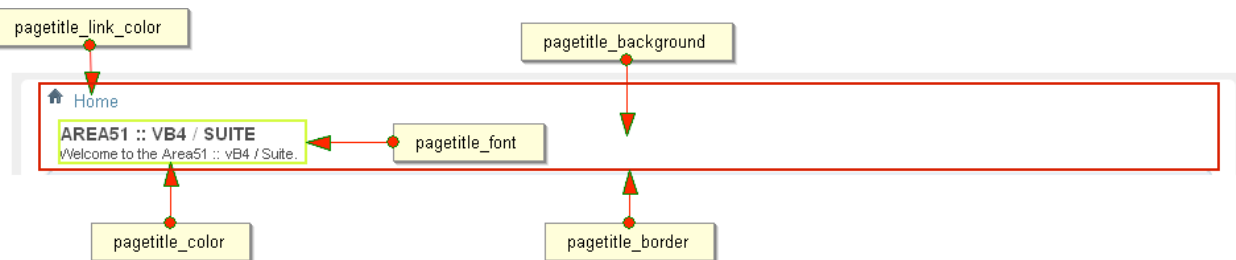

StyleVar	What it Does
input_borderColor	Changes the color of the border around all input fields
input_padding	Changes the amount of pixel space between the input field and other elements

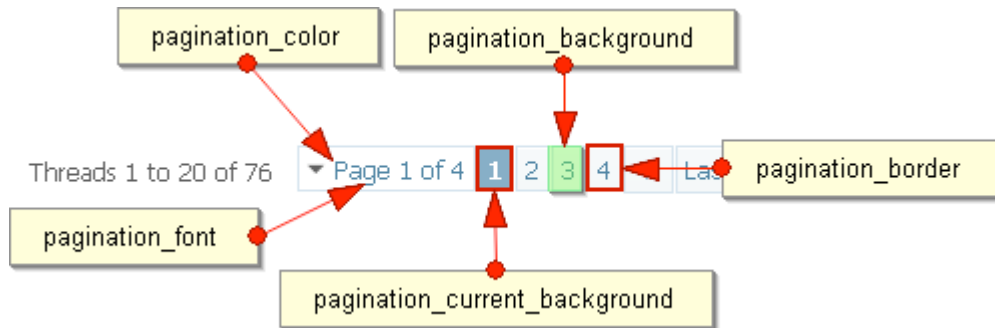

StyleVar	What it Does
lightweightbox_background	Changes the background color around an image in the vBulletin photo albums
lightweightbox_border	Changes the width, color and style of the outline around an image in the vBulletin photo albums

StyleVar	What it Does
padding	Changes the padding between all other elements that have not been defined by other StyleVars

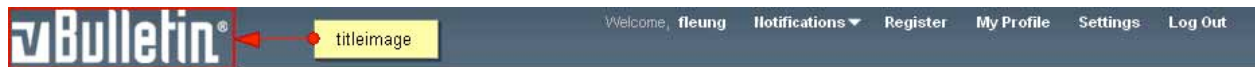

StyleVar	What it Does
pagetitle_background	Changes the background for the page title section
pagetitle_border	Changes the width, color and style of the outline around the page title section
pagetitle_color	Changes the default font color for the tab bar.
pagetitle_font	Changes the default font style for the tab bar.
pagetitle_link_color	Changes the default link color for the tab bar.
pagetitle_linkhover_color	Changes the link hover color for the tab bar.
pagetitle_padding	Changes the amount of pixel space between the tab bar and other elements

StyleVar	What it Does
pagination_background	Controls the background color of the pagination link.
pagination_border	Controls the color and width of the border around the pagination link.
pagination_color	Controls the font color of the pagination link.
pagination_current_background	Controls the background color of the page the user is currently on.
pagination_current_border	Controls the color and width of the border around the page the user is currently on.
pagination_current_color	Controls the font color of the page the user is currently on.
pagination_font	Controls the font size and style of the pagination links.
pagination_hover_border	Controls the color and width of the border around the page link the user hovers over.

StyleVar	What it Does
----------	--------------

restore	This controls the border color and width for tables made in a post.
restore_padding	This controls the amount of padding between cells for a table in a post.
selected_border	This controls the color and width of the border around a selected color in a color selector.
shade_color	Controls the font color for all text that is not controlled by other styleVars.
shade_deep_color	Controls the darkest font color for all text that is not controlled by other styleVars.
shade_mid_color	Controls the mid-range font color for all text that is not controlled by other styleVars.
shadow_color	Controls the color of all shadows not specifically controlled by other StyleVars.
small_fontSize	Controls the font size for the "Small" font size.
time_color	Controls the font color for all time and date stamps.
tiny_fontSize	Controls the font size for the "Tiny" font size.
big_fontSize	Controls the font size for the "Big" font size.
ad_post_maxWidth	Controls the maximum width an ad can take up when it's embedded in a post.
control_focus_background	Controls the highlight color of an active text field.

StyleVar	What it Does
titleimage	Changes the title image.

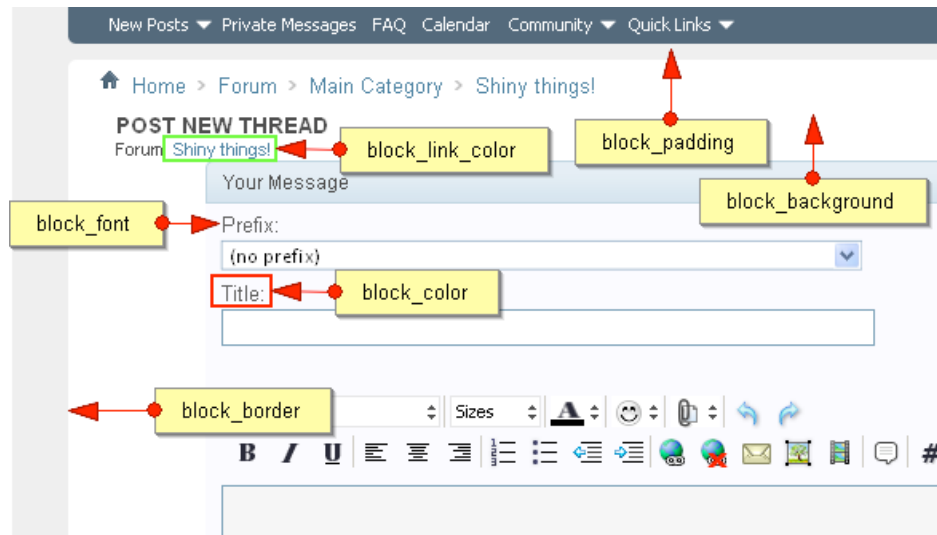

StyleVar	What it Does
textedit_background	Changes the color of texboxes

BBCode Quote Style Vars

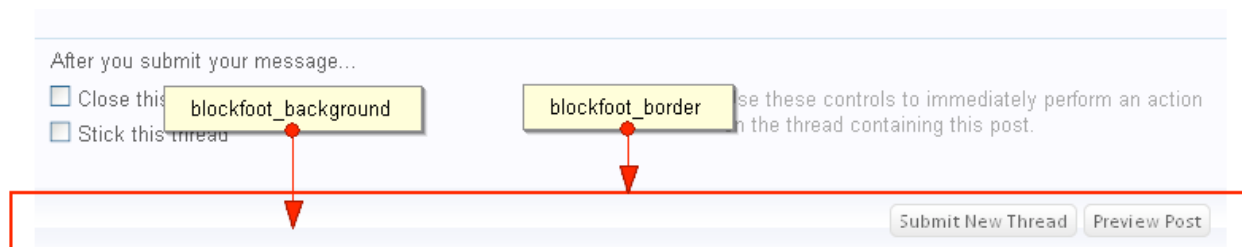

The screenshot shows a forum post interface. At the top, the date and time are 'Sep 26th 2006 11:55 AM'. The post is by 'Jerry', an Administrator with the bio 'admins are awesome'. The post title is 'Re: Introduction: vBulletin Core'. A quote box is visible, containing the text: 'Originally Posted by Scott' followed by 'Core levels will also stop people from creating unrequired dependencies. We probably dont want every single module requiring registry etc'. The quote box has a blue background and a red border. The text inside the quote box is in a larger, bold font. Red arrows point from labels to the corresponding elements: 'bbcode_quote_postedby_font' points to the 'Originally Posted by Scott' text; 'bbcode_quote_border' points to the red border of the quote box; 'bbcode_quote_background' points to the blue background of the quote box; and 'bbcode_quote_font' points to the text inside the quote box. Below the quote box, there is a paragraph of text starting with 'Indeed, you could have a function require...'. The user profile for Jerry is visible on the left, showing 'Join Date: 7th Oct 2002', 'Location: Vancouver', and 'Posts: 19'.

StyleVar	What it Does
bbcode_quote_background	Changes the background color of the quote box.
bbcode_quote_border	Changes the color and width of the quote box.
bbcode_quote_font	Changes the font size and style of the quoted text in the quote box.
bbcode_quote_padding	Changes the amount of padding around a quote box.
bbcode_quote_postedby_font	Changes the font size and style of the "Originally Posted by (username)" text.

Block StyleVars

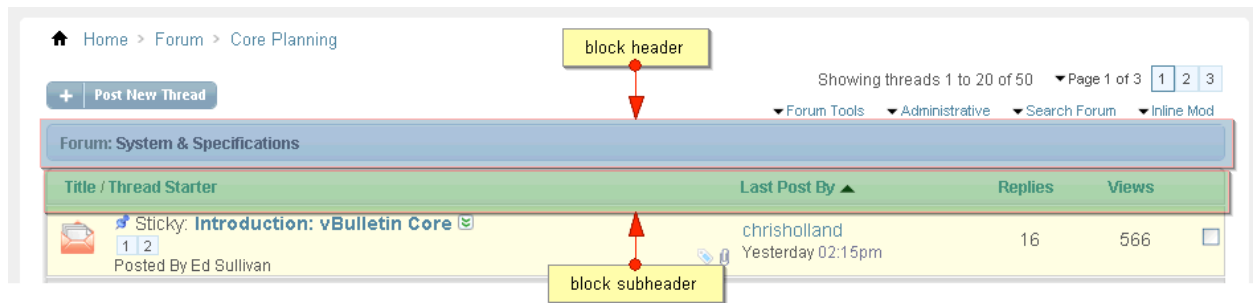

StyleVar	What it Does
block_background	Changes the background color of forms
block_border	Changes the width, color and style of the border around forms
block_color	Changes the text color of forum generated text in forms
block_font	Changes the font style of the forum generated text in forms
block_link_color	Changes the link color of in forms
block_linkhover_color	Changes the hover color of links in forms
block_padding	Changes the amount of space between the header the form

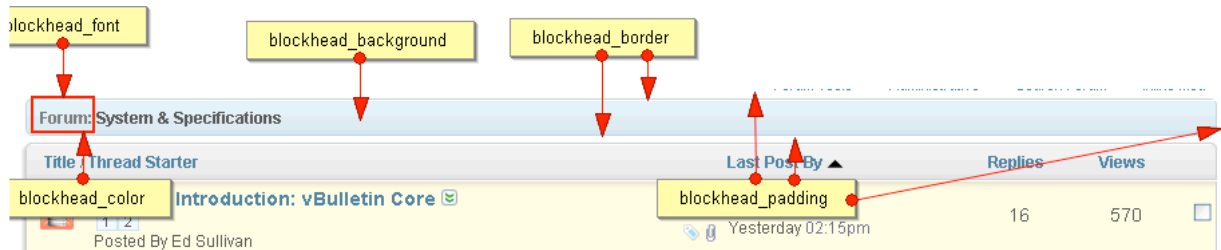

StyleVar	What it Does
----------	--------------

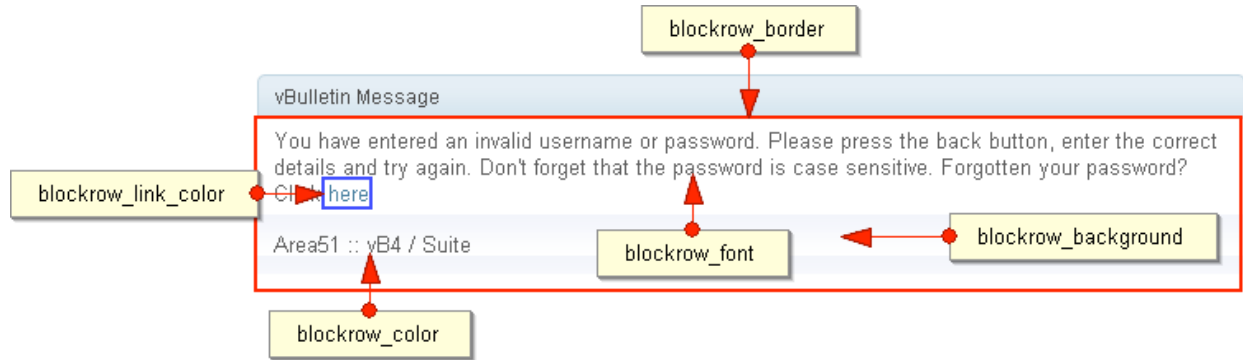

blockfoot_background	Changes the background of the last row on the page
blockfoot_border	Changes the width, color and style of the last row on the page
blockfoot_color	Changes the font color of the text in the last row on the page
blockfoot_font	Changes the font style of the text in the last row on the page
blockfoot_link_color	Changes the link color of links in the last row on the page
blockfoot_linkhover_color	Changes the link hover color of links in the last row on the page
blockfoot_padding	Changes the amount of space between the last row on the page and the content above it

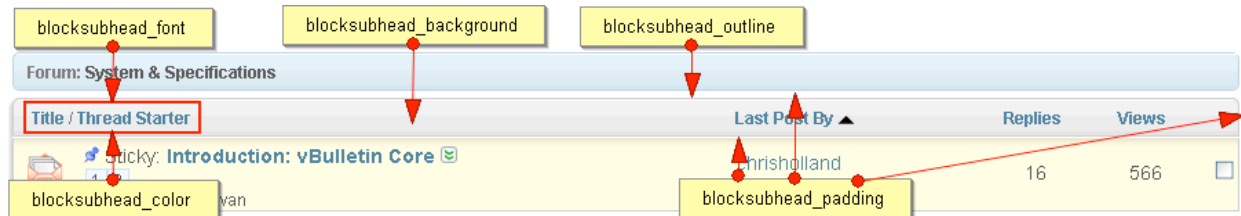

The block header appears at the top of your CMS suite, your blog and your forums. It's used to display the name and location of the page. The block subheader usually only appears in the forum and is used as a legend. You can use the following StyleVars to modify the way your vBulletin looks.

StyleVar	What it Does
blockhead_background	Changes the background color for all block headers
blockhead_border	Changes the width, color and style of the outline around the block head border
blockhead_color	Changes the font color for the text in the block subheader
blockhead_font	Changes the font style for all text in the block header
blockhead_link_color	Changes the color for all links in the block header
blockhead_linkhover_color	Changes what happens when a user hovers over a link in the block header.
blockhead_padding	Changes the amount of pixel space between the block header and other elements

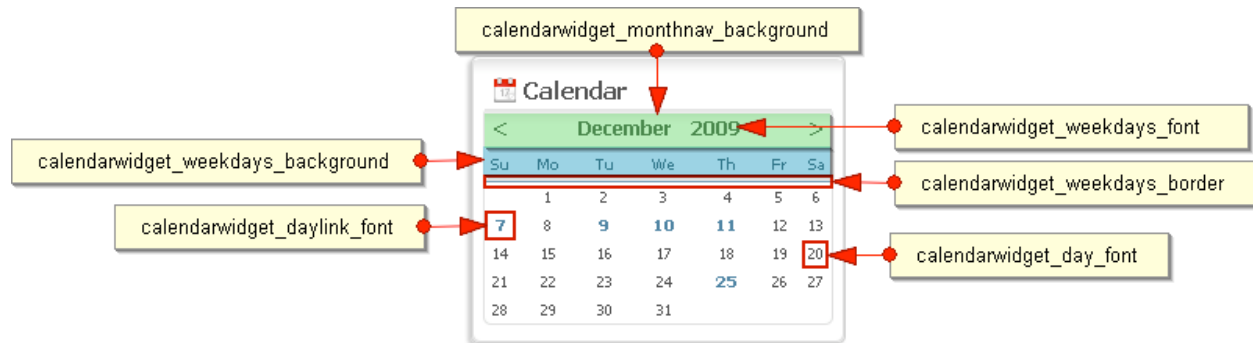

StyleVar	What it Does
blockrow_background	Changes the background color for forum generated text
blockrow_border	Changes the width, color and style of the outline around the block head border
blockrow_color	Changes the font color for the text in the block subheader
blockrow_font	Changes the font style for all text in the block header
blockrow_link_color	Changes the color for all links in the block header
blockrow_linkhover_color	Changes what happens when a user hovers over a link in the block header.
blockrow_padding	Changes the amount of pixel space between the block header and other elements

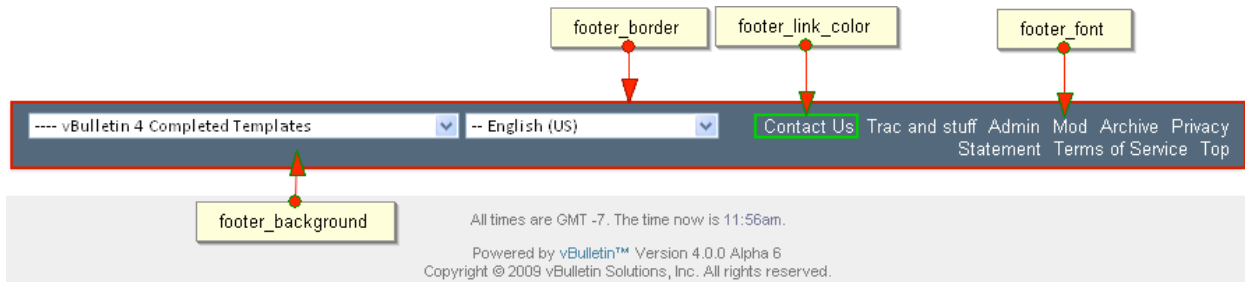

StyleVar	What it Does
blocksubhead_background	Changes the background color for all block subheaders
blocksubhead_border	Changes the width, color and style of the outline around the block subhead border
blocksubhead_color	Changes the font color for the text in the block subheader
blocksubhead_font	Changes the font style for the text in the block subheader
blocksubhead_link_color	Changes the color for all links in the block subheader
blocksubhead_linkhover_color	Changes what happens when a user hovers over a link in the block subheader
blocksubhead_padding	Changes the amount of pixel space between the block subheader and other elements

Calendar Widget StyleVars

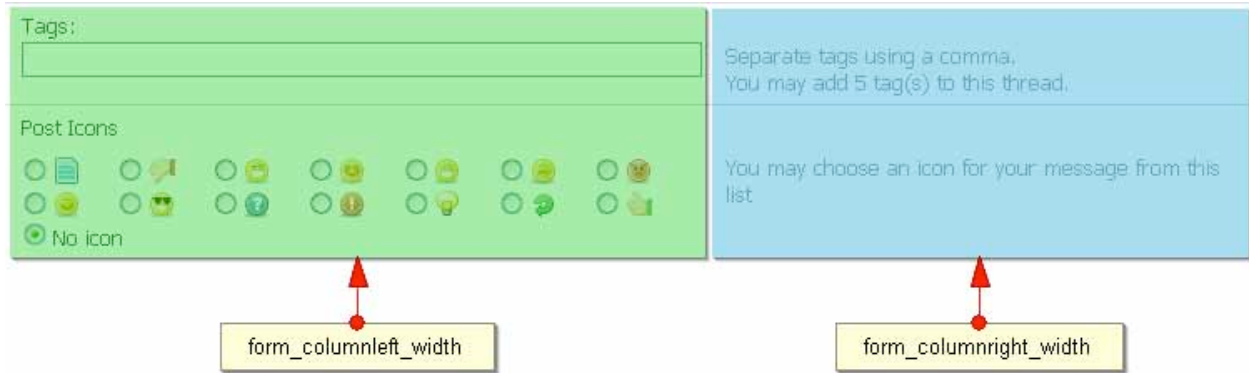

StyleVar	What it Does
calendarwidget_weekdays_background	Controls the background for the weekday header.
calendarwidget_weekdays_border	Controls the width and color of the border separating the weekday header and the calendar days.
calendarwidget_weekdays_font	Controls the font size and style of the weekday header.
calendarwidget_day_font	Controls the font size and style of the days.
calendarwidget_daylink_font	Controls the font size and style of the days with links.
calendarwidget_monthnav_background	Controls the background for the month header.
calendarwidget_monthnav_font	Controls the font size and style of the month header.

Footer StyleVars

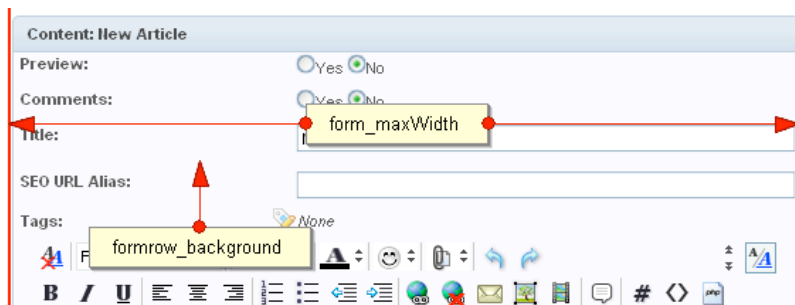

StyleVar	What it Does
footer_background	Changes the background color for the footer at the bottom of the page
footer_border	Changes the width, color and style of the outline around the footer
footer_color	Changes the font color for the text in the footer
footer_copyright_color	Changes the font color for the copyright text.
footer_copyright_font	Changes to font size and style of the copyright text.
footer_font	Changes the font style for the text in the footer
footer_link_color	Changes the color for all links in the footer
footer_linkhover_color	Changes what happens when a user hovers over a link in the footer
footer_moz_shadow_color	
footer_padding	Changes the amount of pixel space between the footer and other elements

Form StyleVars

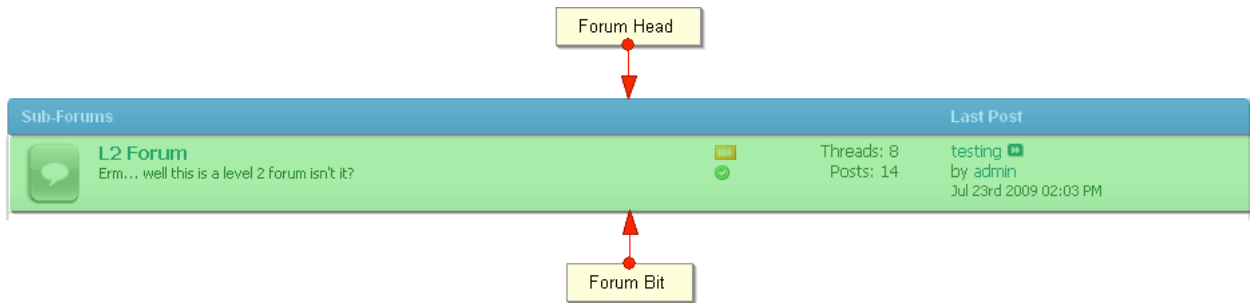

StyleVar	What it Does
form_columnleft_width	Controls the width of the left form column.
form_columnright_width	Controls the width of the right form column.

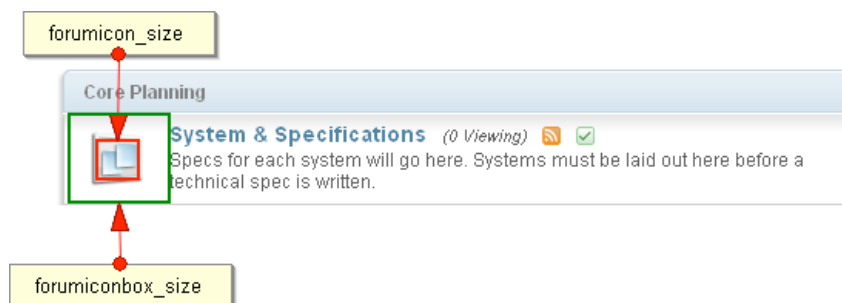

StyleVar	What it Does
form_maxWidth	Controls the maximum width a form takes up when a browser window is resized.
formrow_background	Controls the background color for all forms in the vBulletin suite.
formrow_border	Controls the color and width of the border surrounding the form.
formrow_description_color	Controls the font color of the descriptions.
input_borderColor	Controls the color and width of the border surrounding text fields.
input_padding	Controls the amount of padding between text fields.
textedit_background	Controls the background color of a selected text field.

Forum StyleVars

StyleVar	What it Does
forumhead_background	Controls the background color of the forum head.
forumhead_border	Controls the color and width of the border around the forum head.
forumhead_color	Controls the font color of the forum head.
forumhead_font	Controls the font size and style of the forum head.
forumhead_top_corner_radius	Controls whether or not the top corners of the header are rounded.
forumhead_width	Controls the width of the forum header.

StyleVar	What it Does
forumbit_spacer_width	Controls the width of the space between two forums.
forumbits_aForum	Controls the link color of the forums.
forumbits_border	Controls the width and color of the border surrounding a forum bit.
forumbits_shadow_color	Controls the color of the shadow in a forum bit.
forumbits_text_color	Controls the non-link text color of the forum bit.

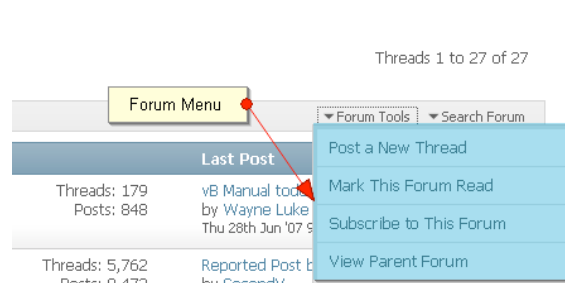

StyleVar	What it Does
----------	--------------

forumicon_size	Changes the pixel size of the read and unread forum icons.
forumiconbox_size	Changes the size of the space surrounding the forum icons.

The screenshot displays a forum control panel with several sections:

- Forum Information and Options:** Shows 'Users Browsing this Forum' with 1 user (fleung) and 0 guests.
- Thread Display Options:** Includes dropdowns for 'Show threads from the...' (Last 75 Days), 'Sort threads by:' (Last Post Time), 'Prefix' ((any thread)), and 'Order threads in...' (Ascending/Descending). A 'Show Threads' button is present.
- Icon Legend:** Lists icons for unread posts, no unread posts, hot threads, and closed threads.
- Posting Permissions:** Lists actions like 'You may post new threads', 'You may post replies', etc., with corresponding status (On/Off) for BB code, Smilies, [IMG] code, and HTML code. A 'Forum Rules' link is also shown.

StyleVar	What it Does
foruminfo_background	Controls the background of the forum information.
foruminfo_border	Controls the color and width of the border around the forum information.
foruminfo_header_background	Controls the background color of the forum information header.
foruminfo_header_border	Controls the color and width of the border around the forum information header.
foruminfo_header_color	Controls the font color of the forum information header.
foruminfo_header_font	Controls the font size and style of the forum information header.

StyleVar	What it Does
forummenu_background	Controls the background color of the forum menu.
forummenu_border	Controls the color and width of the border around the forum menu.
forummenu_border_radius	Controls whether or not the corners of the menu are rounded.
forummenu_color	Controls the font color of each forum item.
forummenu_font	Controls the font size and style of each forum item.

Icon Legend

- Contains unread forum posts
- Contains no unread forum posts
- Forum is a category
- Forum is a Link
- Forum is a project

StyleVar	What it Does
wgo_background	Controls the background color of the “What’s Going On” section.
wgo_border	Controls the width and color of the border around the “What’s Going On” section.
wgoheader_background	Controls the background color of the header for the “What’s Going On” section.
wgoheader_color	Controls the font color of the header for the “What’s Going On” section.
wgoheader_font	Controls the font size and style of the header for the “What’s Going On” section.
wgosubheader_font	Controls the font size and style of the subheader for the “What’s Going On” section.

Header StyleVars

StyleVar	What it Does
header_background	Changes the background color for the header at the top of the page
header_border	Changes the width, color and style of the outline around the header
header_color	Changes the font color for the text in the header
header_font	Changes the font style for the text in the header
header_link_color	Changes the color for all links in the header
header_linkhover_color	Changes what happens when a user hovers over a link in the header
header_padding	Changes the amount of pixel space between the header and other elements

Image Directory StyleVars

The Image Directory StyleVars controls the path and location of image directories.

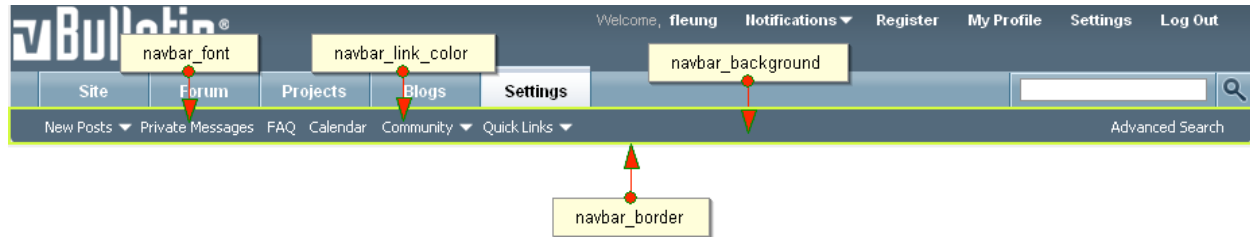

StyleVar	What it Does
imgdir_attach	Controls the image directory path for attachments.
imgdir_button	Controls the image directory path for buttons.
imgdir_cms	Controls the image directory path for CMS images.
imgdir_editor	Controls the image directory path for editor images.
imgdir_gradients	Controls the image directory path for gradients.
imgdir_misc	Controls the image directory path for miscellaneous images.
imgdir_polls	Controls the image directory path for polls.
imgdir_rating	Controls the image directory path for rating icons.
imgdir_reputation	Controls the image directory path for reputation icons.
